Assignment 4

Part 3: Comparison between Weka and Java program

1. Time taken to build model in java program is more than the time taken to build the model in WEKA.
2. WEKA describes in detail about gain of each attribute as compared to the java program.
3. WEKA explicitly specifies the size of the tree as opposed to JAVA program.
4. WEKA has more tools in order to change the numfolds, minnum, maxdepth etc. as opposed to JAVA program.
